Summary

I'm a **MERN** stack developer with **10 months of experience** working at a **SaaS company**. I've worked on building the front end using **React** and **Next**, **back-end APIs** with **Node** and **Express**, and used **MongoDB** for handling data. I'm comfortable working with **AI tools and agents** to help improve workflows and save time. I learn new technologies quickly, work well with different teams, and focus on building solutions that are easy to use, and get the job done.

Skills

- JavaScriptReactNode.js
- ExpressMongoDBHTML
- CSSGitRESTful APIs
- ObjectOriented Programming
- pythonOpenAIMongoose
- NextjsSQLRedis

Education

Sikkim Manipal Institue Of Technology, Sikkim Manipal University
Btech - Mechanical Engineering, CGPA: 5.9
Deoghar, Jharkhand, India, Optional Assignment Dec 2019

Masai School
Software Engineering - Full Stack Web Development
Bengaluru, Karnataka Jun 2024

Experience

Questera
Full-Stack Developer
Remote, Remote Jul 2024 - Apr 2025

- Feedback Workflow**
 - Built the frontend of a product ranked #4 Product of the Day on [Product Hunt](#).
 - Built a customizable website feedback tool with GPT-4o-powered theme detection, analytics dashboard, third-party integrations, and support for bug tracking, ratings, feature requests, and sentiment analysis.
 - Tech Stacks used: **HTML, CSS, JAVASCRIPT, REACT, @questlabs/react-sdk**(our company's own NPM package), **TAILWIND, JOTAI**.
- Hive**
 - Designed and developed a full-stack internal team management tool to replace **ClickUp**.
 - Independently built and optimized a **full-stack tool** still in active use, with indexed queries for **O(1)** performance at scale, handling millions of tasks with high speed and responsiveness.
 - Tech Stack used: **HTML, CSS, JAVASCRIPT, REACT, JOTAI, CHAKRA UI, TAILWIND, @questlabs/react-sdk, EXPRESS, NODE, MONGODB, JWT, BCrypt, Mongoose**.
- Greta**
 - Built an **AI-powered website generator** that **won 1st prize** in a **company hackathon** and was later developed into an **official company product**.
 - Collaborated with two developers during a hackathon to build one of the most impactful project.
 - Tech Stack used: **HTML, CSS, TYPESCRIPT, REACT, JOTAI, TAILWIND, @questlabs/react-sdk, EXPRESS, NODE, MONGODB, JWT, BCrypt, Mongoose, OPENAI, WASM**.
- Nexa**
 - Developed core components of an **AI-powered ad creator**, enabling automated ad design from user inputs using OpenAI models, based on a client-provided PRD.
 - Integrated image generation with **DALL·E 3** and later migrated to **Gemini Flash 1.5** for improved performance; project was in active development at the time of departure.
- Additional Contributions**
 - Contributed to multiple **Next.js** projects while maintaining technical documentation with **GitBook** and **Swagger**, and improving system stability by monitoring and resolving production issues using **Sentry**.
 - Demonstrated strong proficiency in Next.js by building multiple content-heavy websites where React was not suitable. Notable projects include [PLGOS](#)—a site with over 600 pages and 100+ SEO-optimized blogs—and [Questera](#), which features extensive static content such as blogs and resource sections.
